HEALTHCARE

Today's ever-changing and growing healthcare market requires those charged with selecting planning and design solutions to balance patient comfort and convenience with budget and schedule constraints – all while working toward fulfilling their unique corporate vision. With a broad range of experience in the healthcare industry, Andrews Architects has collaborated with a diverse group of professionals to create successful project solutions. Although each project is evaluated in terms of its unique needs and attributes, we draw on our vast experience planning and designing everything from imaging centers and high-tech cardiology centers to operating rooms and private practice medical offices.

Our architectural and interior design professionals will work with you and members of your staff to ensure that your hospital campus, medical technology or medical office design project is a success.

With several areas of expertise in medical technology, hospital campus and medical office design, Andrews Architects has proven experience bringing cost-effective and flexible design solutions to today's healthcare projects.

- Hospital Campus
- Medical Technology
- Medical Office Buildings

Offering customer-focused design solutions, Andrews Architects was founded in 1978 to provide planning, architecture and interior design services for the commercial, healthcare, residential and retail industries. The Andrews Architects team is committed to learning more about your project goals and partnering to create a unique solution that builds on our expertise, yet offers the customized solution you need to compete in today's marketplace.
